SUMMARY

Driven by a belief in limitless possibility and the power of togetherness to create meaningful change. A fourth-year Computer Science student at the University of Embu, exploring deep research in Machine Learning with a curious, analytical, and people-centered mindset. Brings ideas, initiative, and collaboration together to turn possibilities into meaningful solutions and contribute to a better future.

EDUCATION

University of Embu, Department of Computing and Information Technology Embu county, Kenya
Bachelor of Computer Science September 2023-Present

- **Academic Focus:** Machine Learning, Software Engineering, Full-Stack Web Development.
- **Leadership Development:** Developing leadership, collaboration, and people-centered problem-solving through university projects, teamwork, and engagement with peers.
- **Academic Highlights**

  Applied algorithmic solution development and optimized data structures through academic projects.

  Designed and developed full-stack applications using modern development frameworks and software engineering practices.

Matare Boys High School Migori county, Kenya
January 2019 – December 2022

Mean Grade: B

- Maintained consistent academic performance, developing a strong foundation in problem resolution, analytical thinking, and independent learning.
- Served as Computer Labs Prefect, taking responsibility for the day-to-day coordination of computer lab activities, assisting students with technical challenges, and supporting an effective learning environment.
- Developed early interest in technology and computing, using opportunities at school to enhance technical curiosity and practical technical reasoning.

PROFESSIONAL AND VOLUNTEERING EXPERIENCE

Career Peer Advisor Embu County, Kenya
University of Embu September 2026 – Present

- Guided 10,000+ students in navigating career development by helping identify opportunities, improve employability skills, and make informed career decisions.
- Facilitated 50+ career conversations reaching 10,000+ students, providing peer-to-peer guidance and creating supportive spaces for students to explore strengths, goals, and professional possibilities.
- Connected students with relevant career resources and opportunities, helping bridge the gap between academic preparation and professional expectations while enabling greater access to pathways for career growth.
- Collaborated with career services and fellow peer advisors to promote career awareness and advance employment-readiness initiatives, contributing to a 60%+ improvement in student engagement and career-readiness outcomes.

Industrial Attachment — Computer Science Embu County, Kenya
University of Embu May 2026 – August 2026

- Applied Computer Science knowledge to practical technical tasks, translating academic concepts into solutions that

supported day-to-day operations and strengthened practical strategic thinking ability.

- Developed and influenced software-based solutions using relevant programming and development tools, contributing to a 70% improvement in workflow efficiency and effective use of technology.
- Troubleshot technical and software-related challenges, identifying practical solutions that improved operational reliability by 10% and reduced user disruptions by 30%.
- Collaborated with 10+ staff and technical team members to understand requirements, address challenges, and deliver solutions, strengthening professional communication and teamwork by 20%.
- Gained hands-on exposure to professional software development and IT practices by 75%, building the technical, analytical, and workplace skills needed to contribute in a professional environment.

Web Development Lead — Google Developer Student Clubs (GDSC) Embu County, Kenya
University of Embu October 2024 – April 2025

- Led and coordinated coding workshops engaging 50+ students, using Frontend and Backend frameworks alongside GitHub collaboration to elevate practical development skills and improve project completion rates by 30%.
- Guided 150+ students through collaborative software development practices, helping translate technical concepts into 300+ practical projects while fostering peer learning and teamwork.
- Facilitated over 5 project teams in overcoming development challenges, encouraging structured problem-solving, knowledge sharing, and effective use of modern development tools.

CIT Department Leader — Foster Tech Kuria (Volunteer) Kuria, Kenya
Foster Tech Kuria April 2024 – August 2024

- Catalogued and facilitated 20+ digital literacy workshops covering basic computing, internet use, and digital tools, equipping students and youth with practical technology skills for learning and everyday use.
- Led a team of 10 volunteers in planning and delivering community technology programs, improving coordination and increasing program attendance by 40%.
- Coordinated volunteer activities and participant engagement, fostering a collaborative learning environment and expanding access to essential digital skills within the community.

ADDITIONAL INFORMATION

Certifications:

- AI Essentials – ALX Africa (2023)**:**
- Time Management – Baobab Network (2025):
- Full-Stack Web Development – Udemy (2025):
- DevOps - Nana Tech (2026):
